ABOUT ME

Internships and real-world projects. Proficient in Laravel, React.js, PHP, Java, Python, Kotlin, and Unity 3D, with a passion for developing innovative, user-focused, and technology-driven solutions

FINAL YEAR PROJECT

Virtual Mart – 3D Non-Immersive VR Shopping Store (Final Year Project)

- Developed a 3D Non-Immersive VR shopping application using Unity 3D and Blender.
- Integrated a Real-Time Inventory Management System powered by Laravel, PHP, React.js, and Vite.
- Enabled seamless synchronization of products and stock between the VR store and inventory platform.
- Applied VR development, API integration, and full-stack development.
- **GitHub Repository:** https://github.com/masha8663/V-Mart_Inventory

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Air University Aerospace & Aviation Campus, Kamra | 2022 – 2026
CGPA: 3.10

INTERNSHIPS

- **Web Development Intern | Developers Hub | 2025**
 - Built and improved website features using React Vite, Laravel, PHP, HTML, CSS, and JavaScript.
 - Worked on responsive UI, backend integration, GitHub repositories, Postman API testing, and debugging tasks.
- **Technology Intern | Atom Global Information | Jul 2025 - Sep 2025**
 - Worked with Atom Global Information on Unity 3D, Figma, IoT devices, VR systems, and digital twin concepts.
 - Supported Unity and VR-based workflows, IoT integration ideas, and real-time interactive project concepts.
- **Technical Intern | Pakistan Aeronautical Complex Kamra | Jun 2024 - Jul 2024**
 - Studied LRUs, avionics, radar technology, and aircraft systems under a technical environment.

PROJECTS

Full Inventory System - Android Application

Android app for item records, stock control, inventory updates, and operational tracking.

Inventory Management Web Application

Laravel/PHP web application for inventory workflows, item management, and admin-side operations.

Mini Compiler Using Python

Python compiler construction project covering lexical analysis, syntax concepts, and core compiler flow.

Parallel Encryption Tool Using Caesar Cipher

Java tool applying Caesar Cipher logic with parallel processing concepts.

AI Insurance Claim Predictor

Machine learning model for insurance claim risk prediction with a Flask web interface.

Smart Agriculture System Using Cisco Packet Tracer

IoT network design for soil monitoring, automated irrigation, sensors, actuators, and remote access.

Barcode Detection and Decoding

Image-processing project using preprocessing, contour detection, pyzbar, and Tkinter GUI feedback.

Ludo Game Using Multithreading

Multithreaded game project for handling concurrent player actions and smoother gameplay.

Fitness Dashboard Using Windows Forms

C# Windows Forms dashboard for workout tracking, progress monitoring, and fitness data display

TECHNICAL SKILLS

- **Languages:** Java, Python, PHP, Kotlin, C++, JavaScript
- **Web Development:** Laravel, React.js, Vite, HTML, CSS, MySQL, REST APIs
- **Mobile Development:** Android Studio, Firebase, XML
- **VR & 3D:** Unity 3D, Blender, Virtual Reality Development
- **Tools:** Docker, Postman, Git, GitHub, DigitalOcean Droplets, Cisco Packet Tracer
